Mary C. Campbell is An Emeritus Professor of Chemistry at Mount Holyoke College, where she taught biochemistry, general chemistry and physical chemistry, and advised students working on biochemical research projects. Her greedy interest in writing led to the publication of many very successful editions of this textbook. Originally from Philadelphia, Dr. Campbell received her doctorate from Indiana University and completed her postdoctoral work in biophysical chemistry at Johns Hopkins University. Her field of interest includes the study of the physical chemistry of biomolecules, in particular, spectroscopic studies of protein-nucleic acid interactions. She is also co-authored by Sean Farrell at BIOCHEMISTRY, 7e (Cengage Learning). The maximum number of products that can be compared is 4. Please clarify your choice.
